

## Water Saving Tips

- To eliminate unnecessary watering, install a wireless rain sensor device which is able to monitor rain levels
- Make sure that your controller is up to date. If your controller is more than 10 years old, your system is not watering efficiently, resulting in costly water bills
- Remember to have your system valves checked periodically for leaks to keep the sprinkler heads in tip-top condition
- Minimize evaporation by watering during the early morning hours when temperatures are cooler and winds are calmer
- Adjust your watering schedule according to the season and save 30-40% on landscape watering each year
- Have your irrigation system checked frequently and adjust sprinklers so that only your lawn and landscaping are being watered, not the house, sidewalk or street

## REFER A FRIEND

As a small token of our appreciation, we'd like to offer you a gift card of your choice to either Dunkin Donuts or Starbucks for referring a friend. Simply have them mention your name upon scheduling their first service call.

## Happy New Year

With yet another year behind us, this is the perfect time to reflect on 2006 and thank our valued customers that have been such an integral part of our business and success. Without your loyalty and referrals, we wouldn't be in the position that we are in today. Our customers are truly number 1 and we want to thank you!

As Lucas Irrigation continues to grow, Mark continues to be a very active owner and plans to stay that way. If you ever have a question, or concern that you'd like addressed by Mark, don't hesitate to ask for him directly.

We appreciate your business and are looking forward to serving you this upcoming season! As always, our goal is to do everything in our power to keep our valued customers happy. Should you have any questions, concerns and/or suggestions regarding our services, please do not hesitate to call us at (781) 647-1209.

On behalf of the staff at Lucas Irrigation, we'd like to wish you and yours a Happy and Healthy New Year.

Sincerely,  
Your friends at Lucas Irrigation

### EMAIL ADDRESS

*If you have not yet done so, please provide us with your Email address so that we can keep you up-to-date on new products, new services, seasonal service reminders and appointment reminders. We are using this method in an effort to open another means of communication. Rest assured that your contact information will be kept strictly confidential and will not be shared or sold to anyone.*

### HOW DID WE DO???

In an effort to offer our customers the utmost quality in service, we are asking for your feedback. Your opinions, suggestions and feedback count!!!

# Monthly System Monitoring

Let Lucas Irrigation take responsibility for your watering needs... simply sit back and enjoy your beautiful landscape.

This system is specifically designed to look after your individual landscaping. Lucas Irrigation carefully reviews your irrigation requirements, along with your system and creates a System-Monitoring Program designed individually to cater to your needs resulting in optimum performance, while

providing you with the best results for a healthy & vigorous landscape.

This System Monitoring Program consists of **8 seasonal visits** (including Spring Turn-On, Mid-Summer and Winterization) and is designed with **water conservation** in mind. This program has repeatedly been proven to

reduce costly water bills and is by far the **BEST VALUE** for your money.

During each of the 8 visits, a service technician who is familiar with your irrigation system will perform a complete walk-thru to verify that all zones are working properly and watering to their maximum potential.

Take the guesswork out of irrigation scheduling by using your own state-of-the-art weather station to track your local microclimate and automatically calculate a scientific irrigation program! The Hunter ET System is an easy-to-add-on accessory that measures key climate conditions and uses them to calculate your local Evapotranspiration (ET) factor. ET is the combination of two separate processes whereby water is lost from the soil surface by evaporation and from the plant by transpiration. By taking into account the rate at which water is consumed by weather conditions, the ET System will initiate a new schedule to replenish only the water that is actually needed for your sprinkler system, plants and soil conditions. And our WiltGard technology can intervene to trigger protective watering when extreme conditions threaten your plants. The result is a dramatic savings in your water bill (**30% on average**), healthier root zones and your participation in conserving our precious natural resources.

## Wireless Rain Sensor

If the thought of running wires from a controller has kept you from adding a rain sensor to your system, now there's a hassle free alternative. The Hunter Wireless Rain Sensor attaches quickly and easily—simply installing the receiver unit next to your irrigation controller, then installing the transmitter anywhere that the device can receive representative rainfall. There are no ladders needed to attach to a high outcropping on a building and no messy wires to hide out of view. The Hunter Wireless Rain Sensor also stands apart from the others with the following features that no other rain-sensing device offers. The unique Quick Response feature allows the product to shut off immediately when it starts to rain and unlike its competition, Hunter's sophisticated sensing mechanism cannot be fouled by debris, giving the Wireless Rain Sensor the most highly accurate operation. **Save up to 20%** off your landscape watering. Note that this item is now mandated in most cities and towns.

## SAVE \$\$\$ with our PREPAYMENT OPTIONS

We offer discounted rates to customers who pay for services in advance. If you would like to take advantage of this discounted offer, please return your service agreement before **March 1st 2007**.

## NEW ONLINE BILLING FEATURE

Lucas Irrigation is pleased to announce our new online feature that allows you to receive invoices from us via e-mail. You will then have the option to pay it electronically or continue paying by mail.

This online feature offers you several important advantages:

- You can view and/or pay your invoice online
- You can view your account history ANYTIME
- Paying your invoice online is quick, easy, accurate & SECURE
- There are NO fees or service charges
- You will not need to download special software

Simply email us at [info@lucasirrigation.com](mailto:info@lucasirrigation.com) requesting use of this service and we will send you a link to begin your online billing access. If you have any questions about the service, do not hesitate to give us a call (781) 647-1209.

Looking for a convenient way to store a garden hose out-of-sight and still have it readily available for use to water a plant or wash your car?

The HosEnclose provides you with a 60ft coiled garden hose, a spray nozzle and PVC plumbing, all provided in one complete package. Simply open the hinged lid to access for your watering needs.

Please call us to schedule your estimate today. The hassle of pulling a hose through your yard will be over. This is by far, one of the best inventions made for homeowners.

## Lucas Irrigation Guarantee

The Lucas Irrigation Program is more than scientific, it's guaranteed. If there is ever a time that you are not completely satisfied, we will work with you until you are completely satisfied.
